

Petroleum Installation Foreman

We are seeking several Petroleum Construction Foremen to join our team in the niche petroleum industry! You will oversee project planning, scheduling, budgeting, and implementation for a company with increasing growth!

If you possess the skills to multitask, enjoying being a part of building something from the ground up with your hands, and like working together, this is the position for you. Though extremely preferred, actual experience in the petroleum industry is not a must. We will train. We simply need applicants that are willing to embrace a new career change, enjoy a fast paced work environment and have pride in their work.

Responsibilities:

- Oversee all aspects of construction project from planning to implementation
- Allocate resources for assigned projects
- Supervise onsite personnel and subcontractors
- Interface with project inspectors, contractors, architects, engineers, city and county officials, and clients
- Maintain high standards of workmanship that adhere to original plans and specifications

Qualifications:

- Previous experience in construction management or other related fields (**direct petroleum experience not required**)
- Familiarity with construction management software and able to use a PC or tablet
- Strong leadership qualities
- Pride in work
- Deadline and detail-oriented
